DANIEL MASON

Ottawa, ON **|** (613) 981-494 **|** danmasson0@gmail.com **|** github.com/danielmason89 **|** linkedin.com/in/daniel-mason-dev

Positive-minded front-end developer with 2 years of experience. A versatile thinker that strives to write clean and well-structured code while bringing a unique perspective to applications. Possess an engaging personality with an affinity for building trust and meaningful relationships. An analytical, curious mind that seeks to understand what ticks.
Highly motivated and works well under pressure. As an excellent communicator and a team player, Daniel is looking to contribute as a full-time front-end developer.

TECHNICAL SKILLS

- **Languages**: HTML5/CSS3, JavaScript
- **Libraries**: React.js,
- **Framework**: styled-components, Jasmine, Jest, GraphQL, Express.js
- **DataBases**: SQL and MongoDB
- **Tools**: Version Control, Github, VSCode, Figma, Insomnia, CSS Flexbox/Grid, Firebase, Axios, CORS

PROJECTS

CurrGames Curated platform built for those interested in video games   github.com/danielmason89/curr-games
- Developed and designed a front-end application using React.js that allows users to see new and upcoming video games
- Built a responsive frontend deployed to the cloud using Netlify and Heroku to be able to access in real time
- Utilized Node.js and Express.js with dotenv to make requests to a third party api with Cors to enable users to perform a search based upon specific parameters

Mealtime Single Page application that helps save time in the kitchen   github.com/danielmason89/MealTime
- Developed and designed a full-stack application using a 'MERN' stack that allows users to get access to recipes specific to their respective dietary and time restriction needs, within Savvy Coders' 12-week full stack development bootcamp
- Created and deployed a database using MongoDB Atlas cloud database to store and access users' data online
- Utilized CORS middleware with Node.js CRUD server, Express.js, and Axios to perform RESTful api calls to fulfill a user's requests

PetConnect Dog adoption service to aid users with finding a pet   github.com/Co-Lab-You-Belong-in-Tech/pet-connect
- Built and set-up routing for a dog adoption service that utilizes a JSON object to direct users towards their preferred breed of dog, with-in a cross-functional team of 4, during Co.lab's 8-week cross-functional program
- Implemented a front-end design using React.js and Material.ui based on designers' specifications that concisely helps a user adopt a dog of their choice by going through a costum questionnaire

EXPERIENCE

Front End Developer|Peckish|Present

Full Stack Developer/Cross Functional Program|Co.Lab   Sept - Nov 2021
- Completed a 8 - week cross-functional program focused on bringing together Designer, Developer, and Project Manager in order to design, implement, and develop a full-stack application
- Gained a deeper level of understanding in regards to collaborating with another developer, and the process involving designer-developer hand-offs

Full Stack Developer/Scrum Master/Full Stack Immersive|Savvy Coders   2021
- Completed a 12 - week full stack immersive bootcamp focused on JS – DOM interactions, managing collections of data by composing functions, receiving data from an API, and converting a traditional static site into a Single Page Application.
- Gained knowledge of programming languages and frameworks including HTML, CSS, JavaScript, Node.js, Express, MongoDB, Mongoose, SQL and NoSQL databases, learned computer science fundamentals, agile methodology and how to work in a agile mindset

EDUCATION & CERTIFICATIONS
- **Certificate of Completion, Full Stack Development Bootcamp|**Savvy Coders 2021
- **ICAgile Certified Professional Certification|**ICAgile Sept 2021
- **SCRUMstudy Agile Master Certified, (SAMC)|**The Agile Coach Sept 2021
- **Git and Github Bootcamp|**Udemy Sept 2021
- **Introduction to Algorithms|**MIT 2021
